

Digital Services 2: Technologies

Tag	High-level group
ActionScript	Back-end development
Android	Mobile device OS
Assembly	Back-end development
AWS	Operating Systems and platforms
Azure	Operating Systems and platforms
(Visual) Basic	Back-end development
Bing Maps	Mapping
Blackberry	Mobile device OS
C	Back-end development
C#	Back-end development
C++	Back-end development
Cascading style sheets (CSS)	Front-end development
Cassandra	Database development
CouchDB	Database development
DB2	Database development
Delphi/Object Pascal	Back-end development
F#	Back-end development
Google Compute Engine	Operating Systems and platforms
Google Maps	Mapping
HTML	Front-end development
iOS	Mobile device OS
J2EE	Mobile device OS

Java	Back-end development
JavaScript	Back-end development
JavaScript	Front-end development
Linux	Operating Systems and platforms
Lisp	Back-end development
Marklogic	Database development
MATLAB	Back-end development
MongoDB	Database development
MSSQL	Database development
MySQL	Database development
Objective-C	Back-end development
OpenStack	Operating Systems and platforms
OpenStreetMap	Mapping
Oracle	Database development
Perl	Back-end development
PHP	Back-end development
PostgreSQL	Database development
Python	Back-end development
Redis	Database development
REST	APIs
Riak	Database development
Ruby	Back-end development
SOAP	APIs
Sparql	Database development
SQL	Database development

Swift	Back-end development
Transact-SQL	Back-end development
Unix	Operating Systems and platforms
vCloud	Operating Systems and platforms
Visual Basic .NET	Back-end development
Windows	Operating Systems and platforms
Windows Phone	Mobile device OS
XQuery	Database development
